# **Exhibition in Inter BEE 2021 by ARIB/DiBEG**

The 57th Inter BEE (International Broadcast Equipment Exhibition) 2021 was held at the Makuhari Messe located in the suburbs of Tokyo from 17 through 19 November 2021, where ARIB/DiBEG participated in the exhibition.

According to the Inter BEE secretariat, 495 companies and organizations participated in the exhibition. In addition, the exhibition was also held online. Furthermore, SNS (Facebook, twitter) were widely used, with which ARIB/DiBEG also sought publicity.

Comparison of the scale of Inter BEE over the past three years

Year	Number of	Number of	Number of
(Exhibition form)	exhibitors	booths	visitors
2021	495	749	18,308
(Real, Online)			
2020	140	_	_
(Online)			
2019	1,158	2,125	40,375
(Real)			

ARIB/DiBEG explained at its booth the recent standardization in the broadcasting field and the international expansion of ISDB-T, using panels and brochures. At the ARIB/DiBEG booth, some visitors missed more crowded exhibitions in the past before CORONA pandemic, and other visitors asked the reason why ISDB-T has been adopted mainly in Central and South America rather than Southeast Asia, and they also wanted to know the development of next-generation terrestrial digital broadcasting systems.

# ITU-R WP5A the 26th Meeting - ITS related issue

ITU-R WP 5A the 26th meeting was held online in November 2021. Here are proceedings related to ITS.

#### 1. Outline of the meeting

Schedule	15 - 26 November 2021
Meeting	Online
Participants	About 350, 22 people as the Japanese delegation headed by MIC, including 2 members from ARIB

#### 2. Main results related to ITS

- (1) WP 5A has been working on the draft new ITU-R report M.[CAV] which describes wireless communication requirement on CAV (Connected Automated Vehicle). At this meeting, Japan input contribution on automated driving in urban area and on the highway, which was reflected to revision of the draft. The new report is to be completed in November 2022.
- (2) It had been agreed at the previous meeting that ITU-R Recommendation M.2121 on harmonization of ITS frequency band and Report M.2444 about ITS frequency arrangement would be revised. At this meeting, M.2444 was revised reflecting the institutional change in EU in 2020. Both of these revisions are planned to be completed in November 2022.

# 3. Next meeting schedule

The next 27th meeting is scheduled to be held on 23 May - 3 June 2022.

# DiBEG was awarded by the ITU Association of Japan

On 30 November 2021, the 53rd celebration event of "World Telecommunication and Information Society Day" was held in Tokyo, organized by the ITU Association of Japan (ITU-AJ), supported by the MIC, ARIB and TTC.

At the ceremony, "Task Force for Next-generation Digital Terrestrial Television" of DiBEG (Digital Broadcasting Experts Group) for which ARIB works as a secretariat, got "Encouragement Award".

#### < Reason behind receiving the Award >

The Task Force has shared know-how gained in relation to the next generation digital terrestrial television broadcasting being developed in Japan, with those countries that have adopted ISDB-T (Integrated Services Digital Broadcasting-Terrestrial, originally developed in Japan) in order to assist them in the study of their next-generation systems. The group has contributed to strengthening technological collaboration between Japan and these countries as well as to development in the area of broadcasting in these countries, and the group's continued contributions are anticipated.
